

Outline for the meeting on 23/6/2017

June 22, 2017

1 Progress of the Course

- Uneven work distribution.
- Suggestion for future versions of the course: prepared code (based on ours?). Use Octave/Matlab throughout?

2 Final Project

- How to do data preparation?
- Our suggestions for final projects.
- What kind of conclusions would be interesting?
- Suggest one paper for us to read.

3 Final Reports

- One common final report on how the course went.
- Individual reports:
 - “Idea in the foreground”-style.
 - Should final reports contain/present code?
